

RD 1.1 Annotations Review and Questions:

1. Ask about whether they want the screen layout similar to Excel. It was stated in the RFP.
 - a. There is a excel sheet prototype that they have, it looks like a map of the storage facility.
2. Ask about client accounts to client records?
 - No accounts just add client info to each storage unit
 - Client account word is confusing as clients does not use the system. No client record page.
3. Admin in place of manager - universal usage? Should we change “users” to “administrators” in every requirement?
 - Yes just use administrators
4. Ask about each client and about having no client profiles and each unit there is client information typed in
 - There is no client profiles just add client info to each unit
5. What else should we be able to search by? By basic information?
 - a. RFP states last name.
 - i. If there are 2 last names, then it will be either by phone or email.
6. How should we edit the “annotate” line in section 2.3?
 - a. One strict term. Choose annotate or “add notes”

Section 3.4: offered a second unit sentence has a different implication for the client.
