

Comments:

Add cancel exception to use cases on applicable use cases

Login

- Add requirement stating that passwords must be stored in case a staff member or admin forgets their password

Logout

- Confirm Logout Account

Create Account

- Add name to use case
- Typo on alternate path

Assigning a client

- Include all information in use case
- Add cancel to use case

Add new facility map - like tab bar - no longer needed

Adding new storage unit to the facility - wait to see what UI mockups are like kinda

- Choose potential new spots
- Add ability to move or delete new unit
- Add highlight to new created unit on screenshot
- ERROR CASE: For entering unit number that already exists

Removing client

- Needs edit first in use case
- Needs preconditions
- Cancel button on confirm remove

Add clarity to restricted vs not for view unit information

Clarify annotations - edit for staff, edit admin etc

Remove annotations

- Add into edit use case

Add annotation title and don't have it in the box in the mockups

Update balance

- Make mock up screen clear by adding textbox where someone would update balance.
- Idea: add a plus button that someone would adjust balance
- Current screen would just be preview
- Have to hit edit which isn't in use case
- Have back button on transaction history page

Search by client info:

Add way to distinguish search - check box to show unit number, vs name

Available unit:

- Search results and unit number are kinda confusing

Clarify search results - filter by date

Use case steps vs mockups and descriptions need to make consistent.

Distinguish use case titles with bold

Typo pg 51 middle bottom - something about transaction documents

Typo pg 25 - figure 6.1 6.2 state wrong use case

Sequence diagram:

System shouldn't return password and username
